

## Job Description

**Job Title:** Maintenance Engineer Apprenticeship

**Reports to:** Maintenance Manager

**Salary:** Not disclosed

**Location:** Camden Group Sites

**Employment Type:** Permanent

---

### Job Overview:

As an apprentice in Maintenance Engineering, you'll acquire workshop exposure alongside our adept team of maintenance engineers who will offer guidance and mentorship. This team holds a pivotal role in maintaining the operational efficiency of our production equipment. You'll contribute hands-on technical assistance, aiding in assembly, installations, and equipment commissioning, all while honing your fault-finding, programming, and diagnostic abilities.

### The successful candidate will:

- An interest in engineering
- A logical problem solver
- You should have, or expect to have, a minimum of 3 GCSEs with Math and English and IT at Grade 4 or above (or equivalent).
- Ideally you will have some work experience, but this is not essential.
- Working as part of a team and supporting production and operations.
- The ability to work in a high-volume manufacturing environment.
- Implement solutions to help improve machine reliability and quality issues.

### Required Experience

- Demonstrate the capability to communicate to a team.
- Teamwork and flexibility with an open attitude.
- Capable of effective prioritization of tasks and personal time management
- Able to work unsupervised and prioritize their own time and activities.
- Display enthusiasm and accomplishments in both academic and non-academic pursuits.
- Show a keen interest in exploring and applying new technologies.
- Possess proficient verbal and written communication skills in English.

### Essential Criteria:

- Effective communication abilities.
- Excels in team environments.
- Passionate about engineering.
